EXPERIENCE

10x Flow SEO, Remote — *IT Manager*

JANUARY 2020 - PRESENT

I cut our costs every month by consistently finding more efficient and cost-effective alternatives to our software subscriptions. I managed our team's accounts with Google Admin Console and maintained company computers, installed operating systems, and configured servers. I updated and created company policies regarding a variety of topics company-wide. I managed a team of 10 - 15 content writers in various countries, building a close-knit team by being adaptable to different time zones and changing circumstances; and supporting each member of my team to ensure their success.

Drop-Off Computers, Clinton, MO —*IT Specialist*

OCTOBER 2017 - APRIL 2020

I diagnosed and fixed a variety of hardware and software problems. Everything from installing software to replacing processors. I also built and configured linux servers for home use for data storage and personal streaming. Similar to a help desk role, over the phone and in person. Included traveling to the customers' homes and demonstrating software/hardware use.

Spanish Interpreter, Fayetteville, AR —*Interpreter*

JANUARY 2013 - JULY 2017

I taught crash-course Spanish classes to executives with expat assignments. Most of my students were Walmart executives being sent to Central and South America.
